DETAILED ACTION

1. This Office Action is the answer to the Preliminary Amendment filed on July 22, 2002, which paper has been placed of record in the file.
2. Claims **1-56** are pending in this application.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-11, 20-22, 38, 39, 44 and 47** drawn to *a method of evaluating security trading capacity*, classified in class 705, subclass 37.
 - II. Claims **12-19, 23-37, 40-43, 45, 46 and 48-50** drawn to *a method of evaluating security trading capacity*, classified in class 705, subclass 37.
 - III. Claims **51-56** drawn to *a method evaluating security trading capacity* classified in class 705, subclass 37.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination in the Invention I "*setting a portion of an equity to form a cash reserve from said investment portfolio, wherein said cash reserve serves as a cash portion of a future asset allocation*" has separate utility; subcombination in the Invention II "*providing a hypothetical portfolio based on said investment portfolio wherein said disposable cash is calculated based on said hypothetical portfolio*" has separate utility; subcombination in

the Invention III “*providing an updated security quote for each of said tradable securities of said personal investment portfolio, thereby a user is able to view said updated security quote before planning said trade order*” has separate utility. See MPEP § 806.05(d).

5. Because these inventions are independent or distinct for the reasons given above and there would be *a serious burden on the examiner* if restriction is not required because: **1) the inventions have acquired a separate status in the art due to their recognized divergent subject matter; and 2) the inventions require a different field of search**, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Nga B. Nguyen whose telephone number is (571) 272-6796. The examiner can normally be reached on Monday-Thursday from 9:00AM-6:00PM.
